Infect. Immun. 60, 219-230, 1992
A; Title: Nucleotide sequence of the lecithinase operon of Listeria monocytogenes and pos A; Reference number: A43868 MulD:92104678; PMID:1309513
A; Accession: C43868
A; Residues: 1-289 < VAZ>
A; Molacule type: DNA
A; Residues: 1-289 < VAZ>
A; Note: sequence inconsistent with the nucleotide translation
A; Note: sequence extracted from NOBI backbone (NCBIN:74437, NCBIP:74462)
C; Superfamily: Bacillus cereus phospholipase C
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ğ

T43165
probable phospholipase C (EC 3.1.4.3) - Listeria ivanovii (fragment)
N;Alternate names: lecithinase
C;Species: Listeria ivanovii
C;Species: Listeria ivanovii
C;Species: Listeria ivanovii
C;Species: Listeria ivanovii
C;Date: 11.Jan.2000 #sequence_revision 11-Jan.2000 #text_change 02-Sep-2000
C;Accession: T43165

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Apported to a large of the protein alr1339 [imported] - Nostoc sp. (strain PCC 7120)

C) Specified to a protein alr1339 [imported] - Nostoc sp. (strain PCC 7120)

C) Specified Stoc sp. PCC 7120

A,Note: Nostoc sp. Strain PCC 7120

A,Note: National Strain PCC 7120 is a synonym of Anabaena sp. strain PCC 7120

C,Date: 14-Dec-2001 #sequence_revision 14-Dec-2001 #text_change 09-Dec-2002

C,Accasion: AF1372

Glucan 1,3-beta-glucosidase (EC 3.2.1.58) - yeast (Saccharomyces cerevisiae)

N.Alternate names: exo-1,3-beta-glucosidase; protein YD9320A.12c; protein YDR261c
C;Species Saccharomyces cerevisiae
C;Species Saccharomyces cerevisiae
C;Date: 01-Aug-1995 #sequence revision 01-Sep-1995 #text_change 29-Oct-1999
C;Accession: 555516; 867319; 867464
R;Correa, J.; Varquez de Aldana, C.; San Segundo, P.; del Rey, F.

A;Description: EXG2, a gene coding for a exo-1,3-B-glucanase with a GPI anchor attachmen A;Reference number: 855516
A;Molecule type: DNA
A;Reference number: 855516
A;Molecule type: DNA
A;Residues: 1-562 - CORA
A;Cross-references: EMBL:Z46870; NID:G861116; PIDN:CAA86950.1; PID:G861117
A;Experimental source: strain AB320

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
